

Who We Are

@home Energy is a division of Greater Sudbury Utilities. We have been renting water heaters for over 65 years to our loyal customers in many communities across Ontario. As a rental company, we understand our customers expect the convenience of prompt service and our skilled technicians have the experience to make sure your hot water is as dependable as we are. Our customers know we deliver on our promises, and if there is ever an issue or problem, we make it right. We always choose to do the right thing, even when no one is watching.

What We Do

We partner with reputable local contractors to ensure our customers receive the quickest and the best service possible. We install only the latest top quality, high efficiency products.

We set, and consistently surpass, high service standards because we understand our customers expect the convenience of prompt service and our skilled technicians have the experience to make sure your hot water is ready when you want it.

We specialize in renting water heaters & combi-boilers. It's all we do, and we do it REALLY well.

Why Rent

Renting your water heater is an economical option that *feels* like a luxury.

- ✔ Receive all the benefits of a high-end, high-efficiency appliance with no cash down.
- ✔ You value your time and so do we. Worry less about returning your tank to the store for warranty issues, shopping for a plumber and choosing a replacement water heater. You make one call, we do the rest.
- ✔ 24/7 service confidence and protection. Parts and service are included for repairs to the water heater.
- ✔ Competitive and flexible low monthly rental rates that cover both the product and the servicing.
- ✔ Expert work by a licensed technician, backed up by our quality guarantee for the life of the water heater.
- ✔ We are friends and neighbors, and care about our customers. We'll even source special equipment for special circumstances.

Gas Water Heaters

Fuel Source
Natural Gas / Propane Gas

Efficiency
58% to 68%

Output
40 or 50 gallon

Manufacturer
Giant, Bradford White

Natural gas and propane are an energy efficient alternative to electric water heaters. We install only top-of-the-line in quality and efficiency, making the choice to rent an easy one.

Electric Water Heaters

Fuel Source
Electric

Efficiency
80% to 90%

Output
40, 60 or 100 gallon

Manufacturer
Giant

Our electric water heaters are custom ordered from Giant, a proudly Canadian manufacturer since 1950. Our water heaters are insulated with GREENFOAM™ insulation – a product unique to Giant. The insulating qualities are top of the line, and environmentally safe; it contains no HCFC's, CFC's, nor any VOC's!

Tankless Water Heaters

Fuel Source
Natural Gas / Propane Gas

Efficiency
82% to 99%

Output
Endless

Manufacturer
Rinnai, Navien

The on-demand tankless unit is a water heating system that is capable of providing an endless supply of hot water to multiple locations in your home. With this system, there is no need for a holding tank to keep gallons of water hot, increasing energy efficiency. This 'on-demand' way of heating water has several major benefits, making it a popular choice for homeowners.

Combi-boiler Systems

Fuel Source
Natural Gas / Propane Gas

Efficiency
95%

Output
Endless

Manufacturer
Navien

This powerful combi-boiler is the first true combination high-efficiency condensing tankless water heater and boiler system that can heat your home while supplying all the hot water you need for daily life. Renting a Navien Combi-Boiler means you will enjoy radiant heat for the whole house, plus hot water to run multiple outputs at the same time.

Let us introduce you to the trusted brands we offer:

Giant brand gas water heaters are proudly manufactured in Canada, since 1950. Giant tanks are insulated with GREENFOAM™ insulation – a product unique to Giant. The insulating qualities are cutting edge and environmentally safe; and contains no HCFC's, CFC's, nor any VOC's!

Bradford White gas water heaters are an internationally recognized water heater manufacturer with company history dating back to 1881. Bradford White tanks feature Hydro Jet Total Performance System technology, a sediment reduction system, extending the life and efficiency of the tank.
