The Stars of Energy Efficiency

Water heaters are the second highest source of energy consumption in the home and one of the largest energy expenses.¹ Fortunately there are several high-efficiency water heater options that can save you energy and money. @home Energy offers a wide range of top-quality high-efficiency water heating equipment that will fit your lifestyle.

What is ENERGY STAR®?

The ENERGY STAR symbol is the international mark that identifies high-efficiency products and equipment. Products that carry the symbol must meet or exceed ENERGY STAR technical specifications and manufacturers are monitored by Natural Resources Canada.

If you see an ENERGY STAR label on a product you know that the energy-efficiency is better than others in the marketplace, with the same or better performance.

All-Star Lineup

95-99% Energy Efficient

ENERGY STAR certified water heaters are an easy choice for energy savings, performance, and reliability. They use less energy than standard models, saving you money on your utility bills while helping protect the climate.
